

Meteorologist Project Grading Rubric

	0 points	10 points	20 points
Teacher Consultation	Student has not gathered all needed data and is not prepared to go on with the project		Student has gathered all needed data, created two line graphs, and formulated a weather forecast
Line Graphs	Neither line graph correctly displays the collected data.	One of the line graphs correctly displays the collected data, the other does not.	One line graph correctly displays the daily temperature and the other correctly displays the daily barometer reading with the weather conditions included.
Weather Forecast	It appears your weather forecast is not accurate according to your collected data.		Your weather forecast is reasonably accurate according to the collected data
Weather Map	Weather map is not complete with appropriate weather symbols.	Weather map includes some but not all appropriate symbols, therefore does not accurately present your forecast	Weather map includes all appropriate map symbols and accurately presents your forecast
Presentation	Presentation was not done neatly, contained errors, and/or did not include all needed information	Presentation was done neatly and included all needed information, but there were a few errors	Presentation was done neatly, without errors, and included all needed information
